CEDARVILLE COLLEGE NOTES

Cedarville College has secured the services of Mrs. Jessie Russell as Director of the Music Department for the coming year. While Miss Florence Russell will be the teaching. Miss Russell is a graduate of the College of Music, Cincinnati, and has large classes in that city. Under the management of both Mrs. Russell and her daughter for the coming year, Cedarville College is well equipped to render the patrons of the music department a splendid service. The work will open September 11 at 9:30. The tuition and contingent fees are \$12 a semester or \$40 for the year. Now is the time to arrange your work for College next year. Quite a wide range of subjects will be offered. The College is better equipped and in better condition than ever before to render efficient service to all of its patrons. The tuition and contingent fees are \$20 a semester or \$40 a year. Some of the new furniture given by General Synod has come and the rest is expected at any time. The Fall term opens September 11 at 9:30 a. m. The outlook for a good attendance is bright. Every young man and woman, who possibly can, and who cannot be ought to get a College education.

WE WANT A MAN OR WOMAN
to sell Toilet Articles. One who can stand prosperity. We are an old established House opening a new territory. Write at once to W. & H. Walker, 1201 E. Third St., Dayton, Ohio.

Charles Minor, colored, charged with the murder of his wife, Blanche at Dayton and who died after the crime, was arrested at Greenfield and returned to Dayton.

A price of \$212 was charged at Bucyrus for the first new wheat of the 1918 season. A Menominee preacher of eastern Holmes county, he having been indicted for alleged violation of the espionage act.

A carload of cattle in shipment on the Hocking Valley railway from Lancaster to New York was burned at Logan, Loss \$4,000.

Mrs. K. W. Kinsey, 50, and her small grandchild were struck and probably fatally injured by an automobile driven by William Elshon, near Nelsonville. Mrs. Kinsey was pushing a baby buggy in a road when the accident occurred.

Planning a campaign to increase Ohio's wheat acreage this fall, state agriculture officials, conferring with Governor Cox, wired federal officials urging them to fix a price of \$2.40 for 1919 wheat. This price, it was said, would add 10 per cent to this year's acreage. Present price of wheat is \$2.20.

Burns sustained when he stepped on the third rail of a trolley line caused the death at Columbus of G. P. Davis, 4. Mayor Henry M. Davis has ordered the Sunday "blue laws" enforced at St. Clairsville. The sale of tobacco, candy and similar articles and gasoline is prohibited on Sundays.

New prices announced for Ohio coal fields by the fuel administration at Washington mean an increase of 25 cents a ton to the consumer on Hocking coal and a decrease of 15 cents on coal from the Jackson district, according to coal dealers.

We matter how hard your head aches, Dr. Allen's Headache Remedy will hold you.

Entered at the Post-Office, Cedarville, October 31, 1897, as second class matter.

FRIDAY, JULY 26, 1918

A Probate county woman fell out of bed and broke her collar bone while reaching to get hold of the alarm clock that had been set to arouse her.

The government has ordered the cutting down of the height of iron and brass beds and limits the size of the tubing to two inches. A ban has also been put on paving and building bricks, limiting their manufacture to war needs only.

The appearance of the German submarines in American waters has caused Secretary McAdoo to issue an order requiring all American shipowners to have insured the lives of the officers and crews of their vessels trading in Atlantic and Gulf waters. Mere fishing vessels are excepted.

Lieut. Quentin Roosevelt, youngest son of Col. Roosevelt, who has been attached to the American line forces on the Marne front, was killed at Chateau Thierry on July 14, says a communication from Paris. He was returning from a patrol flight when he was attacked by a German squadron.

Liberty loan bonds are very desirable investments, and crafty individuals are using various means to secure them from owners not familiar with stock values and like matters. One method is to offer to exchange our Liberty bonds for stocks of bonds of stocks of doubtful organizations represented as returning a much higher income than the bonds.

An exchange of ours is declaring on its word of honor, if any that there is a couple living down in Georgia that have been married 76 years if a day, and the husband is 99 years old and the wife 98. We like to interview them, or write them and have them tell us folks to folks, as it were, if they had to do it over again, would they do it all over again.

WOUNDED SOLDIERS.

Wounded soldiers on the streets of Washington are not an uncommon sight. These "doubled" soldiers, speeded up the legislation which is intended to provide vocational training for disabled soldiers and sailors. The government is preparing to put a couple million dollars into the work to start off with, since it is calculated that for each million men sent abroad that ten thousand will be returned each year. The bill is the heart of the legislation. This has been carefully worked out by our Allies, and the results in Canada, are accepted as the basis for the plans of the United States. Each wounded soldier is provided hospital treatment and cared for during his convalescence. Then they are taken in charge, and in many cases taught trades, or provided employment. In Canada the wounded soldiers have been returned to their old employers in a great many cases, and this policy will be pursued here. Farmers, as a rule, get back to their avocations easily enough, and in other lines the men readjust themselves so that they become wage earners and self-supporting, independent members of society in a few months.

Cannot Grow Coffee in Europe.
Attempts were made by the Dutch to introduce coffee cultivation in Europe, but without success, as the climatic conditions were not favorable. A number of plants were raised in the hothouses of the botanical gardens at Amsterdam, and the mayor of that city sent some of these plants as a present to King Louis XIV of France, who had them cared for in the hothouses of the "Jardine des Plantes" in Paris, where they yielded several crops.

First Springs Used on Railways.
The first record of the use of springs on railways is George Stephenson's patent of September, 1810. The first locomotive with steel springs was the Agnoris, built by Foster and Rastrick in 1820, and now in South Kensington museum, London. This had laminated springs on the leading wheels.

—Keep in mind the special bargains at Koble's in Xenia when wanting clothes.

HOW'S THIS?

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Medicine.

Hall's Catarrh Medicine has been taken by catarrh sufferers for the past thirty-five years, and has become known as the most reliable remedy for Catarrh. Hall's Catarrh Medicine acts thru the Blood on the mucous surfaces, expelling the Poison from the Blood and healing the diseased portions.

After you have taken Hall's Catarrh Medicine for a short time you will see a great improvement in your general health. Start taking Hall's Catarrh Medicine at once and get rid of catarrh. Send for testimonials, free. J. CHENEY & Co., Toledo, Ohio. Sold by all Druggists, 75c.

Ask for Ballard's Pancake and Buckwheat Flour at Nagley's.

Among other good coffees we have a fresh shipment of Red Bird at Nagley's.

An Opportunity

To Become a Profit-Sharing Partner In The Dayton Power & Light Co.

Here is something new and attractive to everyone who wants to invest money safely and secure a good return.

The Dayton Power & Light Company, with seven years of success behind it, is ready to admit its customers as financial partners.

Each customer can buy a \$100.00 share of our 6 per cent cumulative preferred stock for \$85.00 cash or in monthly payments which means that he will earn 7 per cent on the investment.

Each share can be purchased by paying \$10.00 down and the balance in five payments of \$15.00 each.

The small stockholder is welcomed and purchasers of one share will receive the same consideration as the purchaser of twenty—the maximum number.

The Dayton Power & Light company at the present time is supplying electric service in forty-one communities located in Montgomery, Greene, Miami, Clark and Clinton counties.

Now Is Your Opportunity to Invest

Assured Safety

Electric utilities are staple industries. They render service necessary to the people of a community and its industries.

Electric power is essential to manufacturing. Demands for additional service increase rapidly.

The Dayton Power & Light Company has been successfully conducted under the present management since its organization in 1911.

This record is sufficient to assure the safety of the investment.

Dividends Every Three Months

Dividends are mailed regularly to shareholders every three months.

Your money will be invested in extensions and improvements needed to take care of our growing business.

Your capital and the money it earns for you will remain at home.

Dividends on three or four shares will return to you each year enough to pay the average residential light bill for a year.

Stock May Be Purchased for Cash or Monthly Payments

Additional Information furnished at our office or representative will call and see you.

LYING GAS METERS ON TRIAL BEFORE THE STATE'S EXPERT

Scientific Determination of the Effect of Change in Pressure on the Amount For Which the User Must Pay.

Columbus, July 28.—Mr. Charles V. Critchfield, the gas expert of the Public Utilities Commission, who has been making scientific investigation in the state's laboratory of the value of gas delivered at varying pressures, now reports.

After describing the technical appliances used he exposes to public view the mystery of the gas meter to vindicate its veracity.

Mr. Critchfield takes up the common diaphragm type, saying:

"Within the tin body or case are two compartments, a large lower and an upper and smaller compartment. The lower contains two leather diaphragms, the upper the valves, gears, and the 'clock' or registering device. Each meter has two outside openings, otherwise it is gas tight. One of these openings admits gas from the street main into the meter, the other opening is the outlet through which gas passes from the meter into the house-lines. The principle on which the meter operates is somewhat similar to that of another familiar device, viz., the blacksmith's bellows. As the blacksmith opens the bellows air is drawn in, and as he closes this huge leather bag the air within is forced out into the forge."

In Meter's Lungs.

So in the meter, these two leather diaphragms take the place of two miniature bellows which alternately fill with gas from the main and, in turn, close, forcing the gas onward into the house pipes. The blacksmith's arm is the power operating the bellows at the forge, the pressure of the gas is the force operating the diaphragms. Certain arms and rods attached to these leather diaphragms project upwards into the upper compartment and connect to the valves and registering mechanism. As there are two diaphragms the flow of gas through the meter is continuous. As one of them fills, the other discharges and, through this cycle of expanding and contracting, the hands on the dial are propelled so that each time one of these little leather bellows empties its content of gas, the dial hand is moved a small degree.

"Since the creation of the Ohio Utilities Commission, six years ago, it has been a part of my duties to

inspect and test many domestic meters and, taking into consideration the conditions under which meters operate, as they are exposed to the action of the gas within and heat, cold and moisture without, I can safely say the gas meter is the most reliable measuring apparatus made.

The fact that large quantities of gas may be compressed into small volumes permits its transportation over large distances and makes it possible for cities hundreds of miles removed from the source to be supplied with apparent ease. This contraction of volume by compressing can be controlled at the will of the Utility. But when the Utility releases its distributing system this compressed gas, it loses control, and the other phenomenon of expansibility takes place, limited in its action only by the joint use of the Utility's patrons. In other words, the response of the gas confined in the mains to expand itself to a volume that will meet the simultaneous requirements of every consumer served, results in dissipating the pressure to such a degree as to impair the service to all.

"Gas plays no favorites but goes wherever wide-open valves welcome its expansive character."

"Low Pressure," Say All.

"The public verdict for poor results and high cost is, low pressure."

"The loss in heat units when the pressure was reduced from 4 ounces to 1 ounce was so slight that it was covered up by the ordinary trivial errors made in the observations."

"Three demonstrations prove conclusively that the amount of expansion following a lowering of pressure from 4 ounces to 1 ounce is very slight, and, since domestic meters measure volumes irrespective of pressure, the increased amount of gas passing through and registered by meters at times when pressures are extremely low, (a fraction of one per cent.)

"Our experiments relating to gas values at varying pressures would indicate that the unsatisfactory results of subnormal pressures are due, in the main, to appliances so inflexible that they operate efficiently, as well as economically, only at some predetermined pressure."

PRESIDENT WILSON AND SECRETARY McADOO ASK RELIEF FOR PUBLIC UTILITIES

They Maintain That Public Service Corporations Must Be Given Adequate Rates Because They Are Essential to the War.

Washington, July 28.—One thousand and seven (1,007) corporations furnishing the public with light, heat or traction, whose rates had been fixed on peace-time costs for a term of years, were given advances by city councils or state commissions during the first five months of this year.

These acts, prompted by patriotism, doubtless, because efficient public utilities are necessary to the winning of the war, showed moral heroism, for the positions of councilmen and commissioners are political, and when they are fair with "Big Business," they instantly are assailed by the demagogues who have played for popularity by attacking the aggregations of capital which make public service possible; by the Socialists who demand the abolition of capital and rights in property and by the envious and greedy class, who hate everyone who has saved money so as to be able to buy stock in a public utility—the classes who charge councilmen with "selling out to the interests" if they allow a public utility a living rate.

Who Are the Public?

The public is you and me and the other fellow. The public is always fair, even liberal, when it knows all of the facts. It is always suspicious, and properly so, when asked to approve transactions concerning which it lacks facts necessary to the formation of an intelligent opinion.

That the national government has officially taken cognizance of the situation, which if not relieved, soon will wreck a large majority of the light, heat, traction and power companies is shown by instructions issued by the president in February.

The secretary of the treasury wrote, in part, as follows:

Dear Mr. President: It is obvious that every part of our industrial and economic life should be maintained at its maximum strength in order that each may contribute in the fullest measure to the vigorous prosecution of the war. The transportation of workers to and from our vital industries and the health and comfort of our citizens are dependent upon them, and the necessary power to drive many of our war industries and many other industries essential to the war is produced by them.

I hope you may feel justified in expressing the conviction that the vital part which the public utilities companies represent in the life and war-making energy of the nation ought to receive fair and just recognition by state and local authorities.

Cordially yours, (Signed) W. G. McADOO.

After giving consideration to the facts submitted by the secretary, the president replied:

The White House, February 19.

Mr. Dear Mr. Secretary: I have examined with care the memoranda and letter which you transmitted to me with your letter of the 15th inst.

I fully share the views you express regarding the importance of the public service as a part of our national equipment, especially in war time. It is essential that these utilities should be maintained at their maximum efficiency and that everything reasonably possible should be done with that end in view.

I hope that state and local authorities, where they have not already done so, will, when the facts are properly laid before them, respond properly to the necessities of the situation. I shall be glad to have you communicate with the local authorities whenever the information in your possession suggests that such a course is desirable and in the national interests.

(Signed) WOODROW WILSON.

The comptroller of the currency, John Skelton Williams, in his annual report, makes a strong plea, as do the President and Secretary McAdoo, for relief of the utilities. Mr. Williams points out that the maximum efficiency, which the president says is essential, is not possible "under existing conditions," and that the utilities must have higher rates to make it possible.

Those companies that are going direct to the people with their cases on the ground that they will get a square deal from an informed public, are cutting the ground from under the chronic kicker, agitator or self-seeking demagog. The situation is crucial or the head of the nation would not take it up as he has done.

The federal government evidently intends to support public utilities in advancing utility rates to a point which will make effective service possible in war time.

Great Cash Discounts Great Savings Now

When the great HEATON'S MUSIC STORE opened its doors last week for their midsummer sale of pianos and players we had no idea that this wonderful stock would be selling so rapidly as it is notwithstanding the fact but what we realize that these would be very busy days in this great establishment, where you can find everything that is advertised and at its price. People have remarked what a pleasure it is to come to a sale and actually see everything as it is in the paper. To miss this sale in times like these, when thrift and economy are so important, or to come in later on when the sale has closed, and again let us state that it will "only last but a very short time", would be an uncalled for mistake and an unnecessary loss to you. We suggest that you come here immediately and select your player or piano while you can buy at prices that are within reason, because they won't last very long and it will be a long time, yes, a long time before this happens again.

Extraordinary Offerings in Used Pianos and Players At Heaton's During This Sale Only.

FACTS—A good well-known, substantially built used piano is far superior to any so called highly polished, cheap piano. You will find at this great sale some of the world's standard makes in instruments that have been exchanged as part payment on instruments purchased from Heaton's Music Store.

SALE LASTS BUT A VERY SHORT TIME

Closing Out Talking Machine Department—Great Values

L. R. KIOUS

Republican Candidate for the Nomination For Lieutenant Governor.

L. R. Kious was born in Madison county, Ohio, in 1861.

Was educated in the schools of Mt. Sterling and the University of Wooster.

Has always followed the business of farming and is a member of the state grange.

Does not waver in his party allegiance.

Is serving his second term as a member of the state legislature from Madison county.

Has the unanimous endorsement of the executive, central and advisory committees of his county.

Comes from a county that has given a Republican majority at every state and national election since the party was formed and that has never had a candidate on the Republican state ticket.

Has unwavering faith in our government, our allies and Republican party.

Believes that the federal prohibition amendment should be adopted and that the use of foodstuffs in the manufacture of intoxicating liquors should be prohibited.

Believes that we owe it to our soldiers, our allies and our country to lay a heavy hand on everything that is pro-German, whether it be waste, graft, inefficiency or profiteering.

Believes that the party of Lincoln and McKinley, the party that has always advocated a merchant marine and preparedness, is worthy of your support.

Cyclones and Tornadoes.

The so-called "cyclones" of the West are "tornadoes," which are whirling storms of great violence, but contracted in area. Tornadoes have been known whose greatest width did not exceed a few rods, and those which exceed several miles in width are very unusual. The ordinary storm, where the wind attains a velocity of 40 to 60 miles an hour, has nothing in common with either a cyclone or tornado. It is a straight furish of air and does not whirl at all.

Where Diamonds Come From. In the great diamond fields of South Africa the stones are found in what are called "pipes," round or oval stems of a peculiar sort of rock, several acres in extent at the top and running down to unknown depths. Near the surface this rock, rich in iron, is disintegrated by exposure to the weather and assumes a yellowish color. The precious gems are readily extracted from the friable rock.

For Biblical Students. What was the sweet cane of the Holy Land. In Isaiah it states: "Thou hast bought me no sweet cane with money, neither hast thou filled me with the fat of thy sacrifices; but thou hast made me to serve with thy sins, thou hast wearied me with thine iniquities."

Optimistic Thought. To expose an ambassador to abuse it is only necessary to send him away without an answer.
